	Environment Act	Resource Management Act 1991	
Certification coverage	License number	FSC-C008418	
	FM/CoC Certification	NC-FM/COC-001130	
	Others		
Project overview	<p>plantation, woodchip manufacturing and sales (Eucalyptus)</p> <p>For the purpose of acquiring its own resource for hardwood chip material, SPFL has planted Eucalyptus Nitens on ~10,000ha in the Southland area located at southern end of New Zealand's South Island. Harvesting began in 2005. The harvested area is to be replanted to maintain same total planted area. The current average harvest age is 20. Most of the forestry land is purchased by SPFL and the plantation operation is managed by SWEL (Southwood Export Ltd) under a consignment</p> 		
CSR activities overview	<p>SWEL has been working on protecting Rare, Threatened and Endangered (RTE) species by posting reports on its website when RTE species are spotted. (in line with FSC Principle 9)</p> <p>For details, please see "ESG DATA"</p>
